

Summer Employment-Instructional Division

Since employment in the summer term is a separate entity, distinct from the Fall and Spring semesters and not guaranteed to any faculty member, certain guidelines are necessary to support equitable procedures for selecting instructional personnel. Summer employment teaching appointments will be offered for up to 100% of a full summer appointment as specified by the current faculty salary table of the Alabama Community College System and can be prorated downward according to teaching credit hours assigned and credit hour production generated by the course enrollment. The number of classes offered will be based on institutional needs.
